

# FS-200 Series – General Purpose, Straight-Through Flow Path

Flow Rate Settings: Fixed: 0.5 GPM to 100.0 GPM

Adjustable: 1.0 GPM to 15.0 GPM

Port Size: 1" NPT to 2" NPT

**Primary Construction Material:** Bronze or Stainless Steel

**Setting Type:** Fixed or Adjustable

The FS-200 Series offers accurate flow detection, with 1% repeatability, over a broad range of flow settings and port sizes. Its durable construction delivers long-life reliability in either water or oil. Generous flow paths keep pressure drop low. These switches are ideal for detection of improper flow rates in high volume lubrication, cooling or process systems.

FS-200 Adjustable Series switches offer the same accuracy and are as rugged as those with fixed settings, but provide one additional feature: external adjustability. With these versatile switches your choice of flow settings is diverse within a given range. An ordinary, flat-blade screwdriver is all that's required for the actuation adjustment.

## Pressure Drop - Typical

### 1" NPT and 1-1/2" NPT Ports

#### 2" NPT Ports

Tests conducted with units in horizontal position (lead wires up) with water at +70°F (21°C).

# FS-200 Adjustable

| Port Size NPT | Flow Setting Adjustment Range GPM | Part Numbers |
|---------------|-----------------------------------|--------------|
| 1)            | 1.0-6.0                           | 26615 ≠      |
|               | (5.0-15.0)                        | 26616 ≠      |
|               | 2.0-8.0                           | 26838 🗲      |

- 1. Flow settings for fixed versions are calibrated using water at +70°F on increasing flow, with units in a horizontal position (lead wires up). Consult factory regarding special flow setting calibration, or liquids other than water. Temperature changes will slightly affect the flow settings listed. Oil flow settings will vary with
- 2. Adjustable units that are set to customer specification are subject to GEMS test stand accuracy.
- 3. Use of 150 micron filtration is recommended.
- 4. Minimum 5 PSI line pressure required.

FS-200 Series Flow Switches are U.L. Approved for Class I, Division 2, Groups A, B, C, D hazardous areas.

They are also available with FM-approved, explosion-proof junction box for Class I, Division 1, Group D hazardous locations. Units must be completely assembled at GEMS.
